The accomplishments of the DAC in reducing the burden of diabetes through coordination can be clearly identified	52%	22	31%	13	17%	7	0%	0	0%	0	42

Comment:
Love being a part of DAC!
What more can I do? Could we post DAC needs? I particularly like that I hear about innovative diabetes efforts across the state. Can we also solicit our members at each meeting for topic requests?
More engagement throughout the year.
How do you become a member? These responses are my first impression since this is the first meeting I have attended.
Is there an official process to become a member?
How does one become a 'member'? Do you volunteer? Are you invited?
Guest in attendance. 1st meeting
I really appreciate hearing members introduce themselves and position. But I think networking could be improved by collecting and sharing a list of members, their position, their connection or involvement with diabetes and contact information on annual basis. We are planning a meeting for diabetes educators and such a list could help the planners with connecting with possible presenters or other issues in diabetes. You could state that the list is for DAC members only & not to be shared if sharing is an issue. If you already do this and I missed it, I apologize.
Plan to attend meetings on regular basis. New that I am in the 'know' of the calendar. First actual meeting in > 8 years. I am sure my answers will change the more I am involved.
